

Road Safety Education Campaign Key Points

1. Continue to stress on the importance of using the flyover or pedestrian crossing while crossing the road accordingly to the traffic lights. Pedestrians have a priority to cross the zebra crossing which will be given precedence by motorist and car drivers.
2. The junctions of Jianguo Road and Mingyi Fifth Street are relatively narrow and the traffic will be congested before and after school hours. Students are advised to use the zebra crossing under the overpass to relieve the traffic congestion.
3. Strictly advise students to take a U-turn towards the town's direction at the school's third exit from the temporary carpark to avoid crossing double yellow lines illegally.
4. Emphasis on the importance of wearing full-face helmets while riding a motorcyclist and to slow down at intersections, and prohibit speeding.
5. Precautions for riding electric bicycles:
 - I) Those with a speed exceeding 25 kilometers per hour can be fined NT\$900 to NT\$1,800
 - II) Those who fail to follow the regulations to wear a helmet can be fined up to NT\$300.
 - III) Those who modify electronic control devices or original specifications without authorization can be fined NT\$1,800 to NT\$5,400.
 - IV) Drunk driving is not allowed. Violators can be fined NT\$600 to NT\$1,200.

V) Passengers are not allowed on the back seat, and offenders can be fined NT\$300 to NT\$600.

6. Road safety education on the traffic of entrance of Jianguo Road and Mingyi 5th Street:

The road section rules and traffic lights at the school entrance will have a change as stated by the following starting from 11/16:

I) On the Section2 of Jianguo Road and Mingyi Fifth Street, a three-colored traffic light will be operating all day long.

II) To cooperate with the three-coloured traffic light operating system , amendments are made to the intersection signs and markings:

III) The double yellow line at the entrance of the school is removed , and is changed into a auxiliary road line, extending from the entrance to the second section of Jianguo Road.

IV) Added the sign of "three-phase signal driving according to light signal".

V) Please give priority to courtesy pedestrians when driving through the intersection of Ming Yi 5th Street.

VI) Remind students to pay attention to and follow the signs; Pedestrians should take the pedestrian crossing instead of crossing the road directly.
